---

## PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science student with a strong foundation in data engineering, cybersecurity, and risk management. Proficient in Python, SQL, and cloud platforms (AWS, Azure), with hands-on experience in process improvement, data analysis, and automation. Skilled in collaborating with cross-functional teams to streamline processes and align them with strategic objectives. Eager to contribute to the FIS University Summer Internship Program by leveraging technical expertise, problem-solving skills, and a passion for innovation in fintech.

---

## EDUCATION

### Bachelor of Science in Computer Science

Missouri State University, MO

GPA: 3.3/4.0

---

## TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, JavaScript, C, C#
- **Cloud Platforms:** AWS (EC2, S3, Glue, Redshift), Azure (Databricks, Data Lake Storage)
- **Databases:** Snowflake, MySQL, PostgreSQL, MongoDB
- **Tools:** Microsoft Office Suite, PowerBI, Tableau, Git, Jenkins
- **Concepts:** Risk Management, Audit Processes, SOC (System and Organization Controls), Data Security

---

## PROFESSIONAL EXPERIENCE

### Data Engineer

*Accenture, Hyderabad, India*

*June 2021 – Aug 2022*

- Streamlined ETL processes using Azure Databricks and PySpark, improving data processing efficiency by 47%.
- Collaborated with cross-functional teams to migrate data from on-premises systems to Azure, reducing costs by 30%.
- Designed and implemented scalable data pipelines, ensuring seamless data integration and improved data quality.
- Automated cloud resource provisioning using Terraform, reducing manual intervention and ensuring consistency.
- Conducted A/B testing using SQL and Python, resulting in an 18% increase in website conversion rates.
- Developed real-time data solutions using Azure Stream Analytics and Event Hubs, enhancing data processing capabilities.
- Created and maintained documentation for data workflows, ensuring clarity and alignment with business objectives.

## **Data Engineer**

**Capgemini, Hyderabad, India**

**May 2020 – June 2021**

- Optimized data pipelines using AWS Glue and PySpark, reducing report generation time by 27%.
- Implemented real-time data streaming solutions using AWS Kinesis and EMR, handling high-velocity data from multiple sources.
- Enhanced financial reporting accuracy by developing SQL queries, resulting in a 12% reduction in budget variances.
- Automated CI/CD pipelines using GitHub Actions, reducing deployment time by 40%.
- Created interactive dashboards in PowerBI, leading to an 8% reduction in customer acquisition costs.
- Collaborated with teams to consolidate data into a unified data lake, improving data accessibility and analytics capabilities.

## **PROJECTS**

### **Data Migration to Snowflake**

- Led a data migration project from legacy systems to Snowflake, improving data processing efficiency by 47%.
- Ensured seamless data integration and alignment with business objectives.

### **Customer Data Integration**

- Developed a PySpark-based data integration pipeline to consolidate customer data from multiple sources, resulting in a 30% cost reduction.

---

## **PROFESSIONAL DEVELOPMENT**

- Attended industry seminars on data engineering, cloud technologies, and cybersecurity.
- Self-motivated learner with a strong interest in risk management, audit processes, and SOC compliance.

---

## **KEY ACHIEVEMENTS**

- Improved data processing efficiency by 47% through optimized ETL processes and real-time data solutions.
- Reduced organizational costs by 30% through successful data migration and integration projects.
- Enhanced financial reporting accuracy, leading to a 12% reduction in budget variances.
- Automated workflows and CI/CD pipelines, reducing deployment time by 40%.
